

Teacher: Putri Wanna

Subject/Grade Level: Learning Support, Grade 1

Observer: Chien Webb

Date and Time of Observation: 26-Feb-2025, 8:30am

Teacher Professional Goals: Implement ISTE standards for Educators - Facilitate learning with technology to support student's needs (e.g., UFLI, RAZ Kids)

Teacher Observations	Student Observations
Ms. Wanna is a learning support teacher who provides pull-out support from a mainstream classroom during this time. She specifically provides interventions for one student based on the student's ILP goals, as determined through the SST process. During the first two minutes of the 20-minute session, she warms up by asking the student to reflect on his feelings for the day and reviews the objectives for the session. Ms. Wanna uses a positive tone to encourage the student, especially when he pronounces words correctly. She provides the student with space to pause and take his time to recall words. When transitioning to the next task, Ms. Wanna models the instructions explicitly, helping the student understand and follow the task. In the end of session, she encourages the student to reflect on his progress, aiming for improvement in his reading for the next session.	The student was focused during the one-on-one pull-out session, maintaining attention for 15 minutes and cooperating closely with Ms. Wanna. He demonstrated an understanding of the routines in the session and expressed active listening skills. The student was receptive to feedback and support, showing respect towards Ms. Wanna. In the end of session, the student exhibited a growth mindset, indicating his desire to read more in order to improve his reading skills.

The following elements of teaching and learning were observed during this lesson:

○ Learning driven by inquiry	○ Collaborative learning
○ A LP attribute was explicitly developed	○ Differentiated learning
○ Learning focused on conceptual understanding	○ Students developed as caring global citizens
○ Students given agency to guide their learning	○ Learning explicitly developed an ATL skill

Staff Feedback & Reflection

What do you think went well?

The lesson was well-prepared, focusing on supporting the student in improving his decoding skills through a reading drilling activity. This approach helped the student utilize his blending skills to enhance his reading.

What could you do to further enhance the lesson time?

I would encourage the student to engage more of his critical thinking skills when answering questions. During the reflection time, I plan to ask him more open-ended questions to promote deeper thinking.

What would you possibly change if you did this again?

I would place greater emphasis on the spelling activity, particularly sounding out letters, when the student struggles with decoding a word.
